

NE-47 TYPE CONNECTING BLOCKS

(Card 2)

SEE RATINGS
BELOW

Each consists of a block of insulating material equipped with terminal screws.

Intended to be mounted directly in the wall at the customer's premises with a cord passing through the centre hole. May also be mounted on an NE-43A bracket in standard conduit outlet boxes.

Arranged for a telephone set mounting cord having either a winged type stay band or an "S" hook.

NE-47B type: Equipped with four terminal screws.

NE-47CQ type: Equipped with twelve terminal screws.

NE-47QA type: Equipped with six terminal screws.
