

NE-57B1A TYPE CONNECTING BLOCKS

(Card 2)

SEE RATINGS
BELOW

Each consists of a cast resin block containing binding posts, protector units, nuts, flat washers, and insulation crushing washers, assembled to metal mounting brackets. The protector units are grounded to the mounting brackets.

Provided with fanning strips, and a clamp for terminating No 6 ground wire.

Additional nuts, flat washers, and insulating crushing washers are furnished for making a second connection on each binding post when required.

Intended for use as fuseless protected connecting blocks in building terminals where the ready access principle is used to terminate plastic insulated conductor cable without removal of insulation.

NE-57B1A-16 & -25:

Intended to be installed in NE-G type cable terminal boxes and NE-1A1 cable terminal sections.

NE-57B1A-50:

Intended to be installed in the NE-H202 cable terminal sections.

Code	Fig	No of Pairs of Conductors Arranged for	Contains Protector Units	Dimensions (Inches)		Rating
