

Consists of a block of insulating material equipped with 104 numbered terminals for both screw and solder connections, and five NS-16671 L1 plugs assembled on a metal mounting. Various terminals on the block are connected to terminals on the plugs.

Provided with mounting screws.

Intended for use with the NE-401AN and NE-402AN key mountings to provide means for connecting the associated keys to NE-236A key telephone units (station line concentrators).
