

MARCH 1970

NE - 65BI-64 CONNECTING BLOCK

STANDARD

Consists of two cast resin blocks, each containing 64 binding posts, assembled on a metal mounting bracket. One end of each binding post is arranged for screw connections, and the other end is arranged for mechanically wrapped connections.

Provides for terminating 64 cable pairs on the screw connection side, and 64 pairs of cross-connecting wires on the side arranged for mechanically wrapped connections.

Intended for use in the J99259B remote unit of the NE-1A line concentrator.
