

NE-66Q6A-25:

Consists of a moulded plastic block containing fifty rows of "6-clip" quick-connect terminals, each terminal permits the connection of from 1 to 6 conductors. Equipped with a fanning strip on each side of the block. Intended for terminating 19 through 26 gauge plastic insulated conductors without removal of conductor insulation by means of an NE-714QA tool.

Initial use: NE-66Q6B-25 and NE-66Q6B-50 connecting blocks.

NE-66Q6B-25 and NE-66Q6B-50:

Each consists of a dark grey metal housing having a light olive grey snap-on cover and containing one or two connecting blocks as indicated below. The cover is reversible so as to permit opening from either top or bottom of the housing to provide flexibility of arrangements in space restricted locations.

Initial use: Key telephone cross-connect point.

NE-66Q6B-25:

Contains one NE-66Q6A-25 connecting block.

NE-66Q6B-50:

Contains two NE-66Q6A-25 connecting blocks.
