

NE-400AQI TYPE TONE GENERATORS

(Card 2)

SEE RATINGS
BELOW

NE-400AQ1A:

Consists of a mounting plate equipped with four oscillators, a pulse generator, amplifiers and a tone level alarm.

Provides facilities for generating a distinctive tone signal which is applied to a subscriber line when a hand set has been left off-hook, designed to mount on 23 inch rack.

Initial use: In power systems, in place of motor driven howler interrupter circuits.

NE-400AQ1B:

Same as an NE-400AQ1A tone generator except is equipped with an extension plate, to permit unit to be mounted on a 26 inch rack, and equipped with a power "ON" "OFF" switch.

Initial use: SP-1 stored program electronic switching system.
