

## NE-4 TYPE RESISTOR MOUNTINGS

SEE RATINGS  
BELOW

Brass mountings each consisting of a shoulder stud equipped with a clamping screw.

Intended primarily for use on fuse panels and arranged to mount NE-67 type resistors on the rear and NE-74E heat coils on the front of the panel. The resistors and heat coils when so mounted are connected in series through the mounting.

Provided with an insulator at the rear end to prevent adjacent resistors from coming in contact with each other. Will mount on 0.750 inch centres.

| Code  | Dimension (Inches) |       |       | Rating   |
|-------|--------------------|-------|-------|----------|
|       | (a)                | (b)   | (c)   |          |
| NE-4A | 1.375              | 0.875 | 6.312 | Standard |
| NE-4B | 1.000              | 0.500 | 5.938 | "        |
