

JUNE 30, 1980

TYPE "AFMW-UM" MULTIPLE SHEATH CABLES

SEE RATINGS
BELOW

Consist of AFMW cable with unsoldered mechanical protection. Corrugated steel applied longitudinally with overlapped seam (not soldered), a flooding compound, and a polyethylene jacket.

Provide light mechanical protection. In the event that the outer polyethylene jacket and steel shield are damaged, the metal shields of the ASP sheath are protected by the sheath jacket.

Conductor: No. 24 AWG copper.
