CS203A ALARM DETECTOR

A.T.&T.CO.
STANDARD

Consists of a printed wiring board assembly, a 9-V battery, battery retainer, and adapter contained in a cylindrical shaped housing.

Shipped with an installation kit and a CIB booklet.

Functions as a battery powered photoelectric smoke detector and a radio frequency transmitter combined.

When the smoke detector is activated, it sounds a loud local alarm and the radio frequency transmitter is turned on.

The transmitter sends a coded digital signal to be received by either a No. 100A or the ZCS103A alarm reporting dialer.

The alarm detector is UL listed as a smoke detector and as an accessory for the Emergency Call System.

Initial use: Emergency Call System.

Comcode: 104 027 677
