

KS SPECIFICATION
NUMERICAL AND CLASSIFIED
CHECKING LIST

Bell Telephone Laboratories
Research and Development Unit of the Bell System

APRIL 1, 1968

The first part of this checking list is a numerically arranged list of KS specifications covering telephone products for which there is a continuing demand. Reference is made to other known sources of information which are currently available on the various KS products. Specifications marked with an asterisk (*) have been added or changed in status since the last issue of this checking list.

The second part of this checking list covers the same specifications arranged in topical form.

This list will be reissued semiannually to indicate new and reissued specifications. Manufacture Discontinued specifications will no longer appear in the checking list.
